+ ADDITIONAL INFORMATIONS

I think I can easily establish new acquaintances and as easily find myself in a new environments. I am organized and I like to work according to a predetermined plan.

I am open for new possibilities, and I love to educate myself in many different areas. I think I can make a logical and objective assessment of the situation. I think of tasks more like challenges to overcome every day.

Sometimes I like to devote a little more time on the job in order to refine and maximize performance.

+ INTERESTS & HOBBIES

In addition to my interests in programming and learning about new technologies, I also like to do sports such as cycling, running, swimming and playing basketball. In my spare time I meet up with friends, sing on karaoke and in band. I try to self-improve myself by gaining new experiences. Beside of technical related interests I am working as a Dj running karaoke near Cracow main square. From the beginning of October 2016 I have started studying in IT college on On the on the game development specialisation to gain new experience and a degree.
