+ ADDITIONAL INFORMATIONS

I think I can easily establish new acquaintances and as easily find myself in a new environment. I am organized and I like to work according to a predetermined plan.

I am open for new possibilities, and I love to educate myself in many different areas. I think I can make a logical and objective assessment of the situation. I think of tasks more like challenges to overcome every day.

Sometimes I like to devote a little more time on the job in order to refine and maximize performance.

+ INTERESTS & HOBBIES

In addition to my interests in programming and learning about new technologies I try to self-improve myself by gaining new experiences. I was working as a Dj in a club at Krakow main square running karaoke parties for 6 years. I used to hitchhike a lot as well. In 2016 I started studying in IT university on the game development specialization to gain new programming experience. I was helping with the organization of one of the biggest post-apocalyptic LARPs in Europe. I got a shooting range instructor's papers and a gun license.
I am in the process of adapting a cave in Spain near Alicante to host digital nomads.
